Match Your Brand With Motor City With 7 Different Colors To Choose From

INNOVATIVE CONVEYING TECHNOLOGY FOR CAR WASHES SINCE 2004.

Motor City Wash Works and MINDA have partnered together to introduce the most reliable, durable and safest belt conveyor offering to the professional car wash industry.

MINDA has been specializing in innovative conveying technology for car washes since 2004.

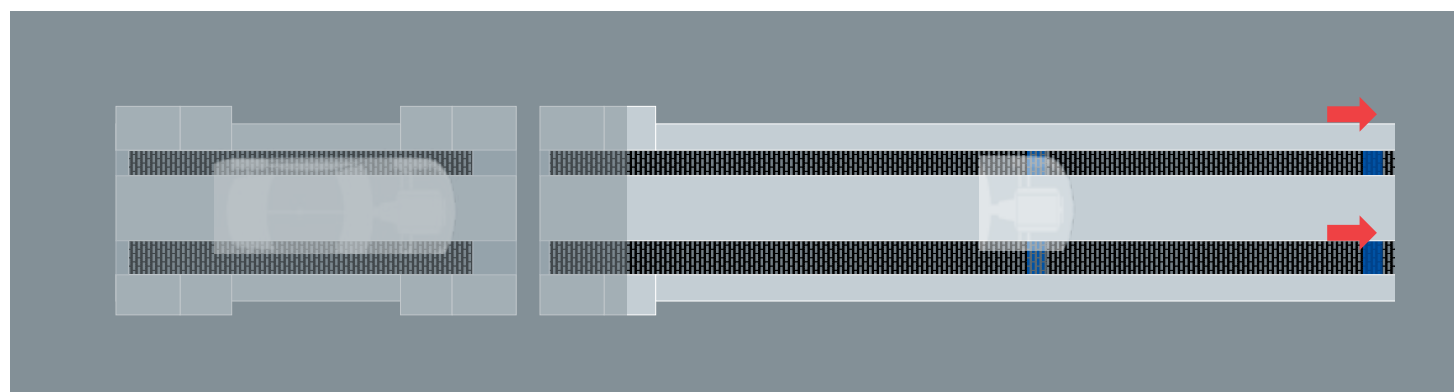

Our conveyors stand apart because they have **long service lives**, handle vehicles **carefully** and **efficiently** plus, they are incredibly **safe** to operate.

Together, Motor City Wash Works and MINDA will deliver a superior, "Best in Class" vehicle conveyor system to ensure your facility has maximum uptime and capacity!

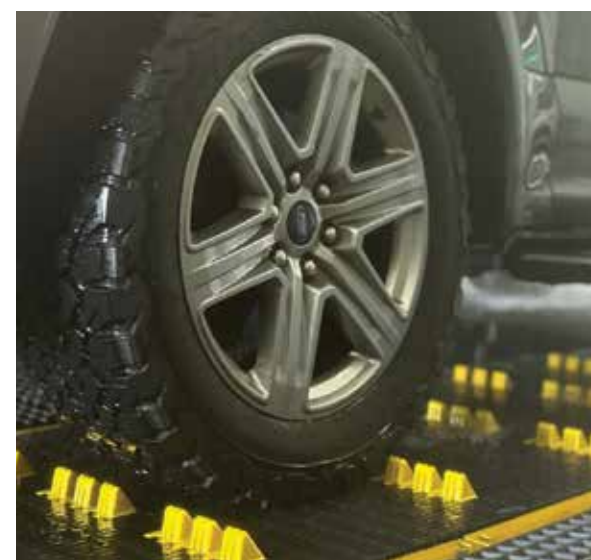

Double-Track Technology - The Reliable Alternative

- › No accidents because of wheel lock-ups etc.
- › No tripping hazards anywhere on the conveyor
- › Superior capacity due to flexible vehicle positioning
- › Smooth and efficient loading

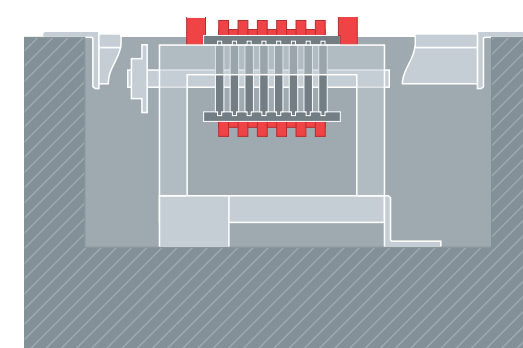

Guiderail Free Technology

- › Vehicle Conveying Without Rim Damage
- › Ideal For Wide Tires And Vehicles With Lower Suspension
- › Smooth And Easy Loading Provide Increased Capacity
- › Provides A Superior Consumer Experience

Durable and Maintenance-free Design

The Glide XD™ belt's supporting structure consists of galvanized steel components. Parts subject to significant wear and tear, such as drive shafts and idler shafts, are made of solid material. Chains, sprockets, cleats, side guides, alignment rollers etc. are made of extremely impact-resistant plastic and require no lubrication. The maintenance requirement is much lower than with conventional drag chain conveyors.

Durable › Reliable › Safe › Efficient

Innovative belt flush and engineered stainless steel wear plate design offers an extended lifespan that far surpasses the competition.
